

## Con Corazón Outreach Report

13 May 2021 – Marampaqui

We have a new member of the Con Corazón team! Her name is Wendy Lucana and she is a biologist. This is her first time in Marampaqui and she is happy to work with us. Now our team is complete and each member has many desires to help and give hope to those who need it most.

Also, our dental unit is working much better and we can now do tooth fillings. The patients were delighted with this news.

### Activities

- In the medical area we had 10 patients, some patients came with joint diseases and others with respiratory diseases.
- In the area of dentistry, 8 patients came and many dental restorations have done and some dental extractions were carried out.
- In the lab, 4 tests were done, most of them due to lower back pain.
- In the nursing area, saline solution with medications was administered intravenously.

### Photo Gallery

The entire Villagra family came for a treatment in our dental office. Tooth fillings were done thanks to our renovated dental unit.

Christian Jara is 24 years old and fell from his horse. As a consequence, he broke his jaw and was in the hospital for 3 months. He comes to the Con Corazón health center because he still feels weak and dizzy. He now he needs to see the doctor to examine his condition, since he lost a lot of blood in recent months. The doctor examines him and recommends intravenous vitamin C, this due to the weakness of his body. Christian feels much better and grateful!

30-year-old Profeta Condori comes from Pacchanta and had to walk 2.5 hours to the Con Corazón health center because her tooth hurts. She likes to come to our health center to have her teeth fixed because she feels well treated. Previously, she went to other health centers in the area, but she no longer likes it because, according to her, they treat her poorly. She also says that they make her wait too long and that they make her hurt because they do not use anesthesia for big dental fillings. She also manifested that people in other health centers do not respect because of being a woman. They do not greet her either.

Yoni Huilca, 27, lives next door to our Con Corazón health center and has 2 children. She helps us out a lot! She does the cleaning, cooks for the team, helps with triage, and translates when needed. She takes care of the patients and explains the instructions given by the doctors. We are very happy with her work.

Wendy Lucana, 28 years old, is a biologist and part of our team. It is her first time in Marampaqui and she is there to support us with the laboratory service. She says: "I love this activity because there are so many people who really need it. Lab services make treatments more expensive thus worsens the lack of access to health. I am glad that the laboratory is at the service of the community. I like to collaborate to the project."
