

Con Corazón Outreach Report

24th November 2021 – Marampaqui

The Con Corazón team met our president Danièle Turkier through a video call. At 06:30h whilst driving to Marampaqui, the team was really excited about getting to know Danièle. Afterwards we arrived to Marampaqui with a new team member medical Dr. Irisca Chalco. She also speaks Quechua and has experience on using our obstetric ultrasound.

Activities

Dr. Irisca got to see 26 patients, many patients with pain problems from different sources.

Dr. Flor got to see 15 dental patients.

Our biologist Wendy processed 14 lab exams! Dr. Irisca kept her busy.

Photo gallery

We are very happy to have a lightning rod installed right near our Medical Center. That will reduce the risk of death, and damage to structures.

The main post sits on a solid concrete structure. There is a metal frame underneath (middle photo). In the image to the right, a lot of work has been done with an excavator we had to hire in order to make the Ground Rod. 3 wells of 2.60 meters deep have been dug.

Our health promoter Jhoni, teaching about prevention and health promotion. Patients are really interested in acquiring new knowledge. We encourage behavior change to prevent non-communicable diseases.

Veronica Condori and her son Jairo have come to our Medical Center several times. She said: “Con Corazón is good for us, especially for those who don't have money. They teach us to wash our hands and brush our teeth. Before we did not know that it was important. It is worth the distance to walk to Con Corazón instead of going to the city seeking for medical attention.

Our biologist Wendy has been very busy. Here, she's measuring the patient's glucose.

Dr. Irisca examining a male patient with possible kidney stones. The patient came with severe pain in his lower back, blood in the urine and nausea.

Hilda, Mary Luz and Jessica are from Tinke, a small town two hours walk from Marampaqui. They found out about us through the local radio. After their visit to our Medical Center, they said that they prefer to come to Marampaqui because the doctors in Tinke are not kind to them and they have to wait a long time for medical attention. In the right picture they are going back home to Tinke.
