

Con Corazón Outreach Report

03th February 2022 – Marampaqui

An important step for Con Corazón is the coordination of activities with the Peruvian Ministry of Health. We had a meeting with Dr. Waldyr Alvarez, head of the Ocongate micro network (the health center that governs the region where Con Corazón works). Also present at the meeting was the obstetrician Virginia Quispe, head of the Tinke health center (the closest health center to Marampaqui). The agreement we reached was that the activities at the Con Corazón health center should be shared with the Ministry of Health. This will avoid duplication of services/treatments to patients. They also promised to support us in the promotional preventive health part. In this way our strength and health workforce will increase achieving better impact and results.

Activities

Apart from regular activities, we visit houses where patients are bedridden in pain for a long time. This was at the request of relatives, who approached us asking for help. We organized visits but that takes a long time since we have to walk a long way. In this area, the population is very dispersed and for that reason it is very difficult to reach everyone.

- General Medicine, 25 patients were treated
- Dentist, 13 patients had dental treatments
- Laboratory, 9 laboratory tests
- Pharmacy, medicines were delivered to all patients.
- Nurse, 8 patients received intramuscular injectables, in addition to home visits.

Visit to the home of some elderly people. Genaro is 78 years old, who asked for help for his 72-year-old wife, Nelly, who has constant pain in her legs. Dr. Gustavo diagnosed that she has a chronic problem of osteoarthritis. Nurse Sayda administered intramuscular anti-inflammatories to help her with the pain that is exacerbated especially in this rainy and cold season.

The Con Corazón Pharmacy distributes medications and toothbrushing kits free of charge. The instructions are given by the doctors and Jhoni makes sure that the instructions are explained in the Quechua language.

The residents of Marampaqui say that the incidence of lightning has decreased "It no longer feels like before" says one of them, who was afraid of lightning.
