

## Con Corazón Outreach Report

12<sup>th</sup> April 2022 – Marampaqui

Early in the morning, before leaving for Marampaqui, Dr. Gustavo mentioned that his 1-year-old daughter was slightly ill. Despite that, he accompanied us along with the whole team. After finishing all the patients, Dr. Gustavo received an urgent message. His daughter had worsened and her respiratory system problems were very worrying. While our dentist finished with her last patients, we made the decision to take the doctor to the town of Ocongate, where he could take a car that would take him directly to Cusco to take care of his daughter. After this, we returned to Marampaqui to end the day with lunch and then take a picture with the new uniforms.

Now, Dr. Gustavo's daughter is in better health and he is very grateful for the decision to take him to Ocongate to reunite with his family and take care of his baby.

### Activities

This time fewer patients came for medicine and dentistry than usual. There was a very important meeting within one of the villages. The government has offered them some money due to the crisis in Peru. Still they kept us very busy.

- General Medicine: 14 patients were seen.
- Dentist: 8 patients kept the dentist busy. We have performed more treatments in each patient in comparison to regular outreaches.
- Laboratory: 4 lab exams were performed by our biologist Wendy. This time, we brought another Biologist and her name is also Wendy. The main one is currently in Colombia.
- Nurse, Sayda had been teaching Jhoni to place intramuscular injections. Jhoni is feeling more confident each time in this opportunity.

Wendy and Jhoni are cooking lunch for us. This time we ate a delicious salad with fried meat. Jhoni is expert cooking rice.

Water have never been a problem, especially during the rainy season. Since the rainy season is over, people in Marampaqui must find another source of water. Currently, Porfirio is working on getting water from underground springs.
