

Con Corazón Outreach Report

10th December 2022 – Marampaqui

Continuing with the prevention and health promotion campaigns in Marampaqui, we have adopted new strategies. In each campaign, a member of the Con Corazon team gives a talk on a specific topic that they themselves prepare. These must be simple, clear and concise. The participation of listeners is important including children and adolescents. We do this preferably while patients are waiting for medical or dental care.

As a consequence of these activities, patients have learned to change their traditional habits for new habits that generate new behaviors in them and their families. What seems obvious and easy for us to understand is different for patients in this area. They have not received an education that allows them to make good decisions about their health.

Activities

- General Medicine, 22 patients were seen.
- Dentist, 11 patients were seen by our dentist
- Laboratory, 08 lab exams were performed.

We keep our pharmacy with enough medicines for the patients. Sayda is looking for the medicines prescribed by the doctor.

Johni, our health promoter and cleaner, is pregnant! Very soon she will give birth to her baby.
