

Con Corazón Outreach Report

22th February 2023 – Marampaqui

Despite the strikes and roadblocks, there are days when there are no protests. When the residents of the area tell us this good news for us by phone, we immediately plan our visit to Marampaqui with prior coordination of the entire team. This is how we can continue with the activities, but in a cautious way.

Every time we go to Marampaqui, we find very different scenes from what we are used to seeing in the city. On this occasion, the team was lucky enough to see an alpaca giving birth to her baby. It was a spectacle that moved all the people who observed such an event from a distance.

Activities

Medicine, 25 patients could be seen, most with lower back pain.

Dentist, 12 patients, mostly dental extractions.

Laboratory, 08 tests to rule out urinary diseases.

Call for a meeting for the delivery of the kitchens

Photo Gallery

Dino, supports us in triage now. Since Johni (Dino's wife) gave birth to her baby, Dino took her position temporarily.

Laboratory and dental in the process of having the job done. Even though the environment and office's set up is different as in their office at the city, the team is always able to give their best.

Juan Carlos untying the plastic cover for the greenhouse. We expect the roof to be ready for our next visit.
