

## Con Corazón Outreach Report

30<sup>th</sup> March 2023 – Marampaqui

The village of Marampaqui has new chimneys. The implementation of Smokeless Metal Stoves - SMS is a reality! We managed to replace old stoves that emit smoke that damages the lungs, with healthy ones. The key, previous awareness talks and information about health (Health Promotion). We cannot impose new ideas if we do not allow the community to participate directly in decision-making.

On the next visit, we will continue with some tips to implement the SMSs, we will calibrate the location and also different ideas of cooking in this new stove.

There is still a long way to go, some beneficiaries implemented it and immediately adopted it as part of their daily lives. Others still have a hard time making the change. It is there where we must continue talking about habits and good health to produce a real change. The path is laid out and the goal is in sight.

### Activities

Medicine, we have seen 24 patients .

Dentist, 13 patients

Laboratory, 09 lab tests were done.

## Photo Gallery

Paul and Amélie are our new volunteers. They are staying with us four weeks, starting at the dental clinic as dental assistants.

Building the new structure for the greenhouse.

Maintenance work to our power generator. Giving some love to our machine that saves us from interrupting our activities when there is not power.

*con corazón*  
perú - suiza

Installing a glass for the window to protect our generator from the harsh weather.
