

## Con Corazón Outreach Report

15<sup>th</sup> June 2023 – Marampaqui

Every time we arrive in Marampaqui, people welcome us with great joy. Immediately upon arrival, patients help us unload medicines, dental equipment, food, and other little things.

Immediately upon arrival, the entire Con Corazón team gets ready, putting on their uniforms, reviewing available medicines and expiration dates, reviewing medical records, setting up the mobile dental unit and laboratory, and then we are ready to receive patients.

We feel that the welcome of our patients gives us a sign of gratitude and a good relationship with all of them. This motivates us to move forward and continue helping all the vulnerable people in the area who need to re-establish their health.

### Activities

Medicine, we have seen 25 patients.

Dentist, 13 patients

Laboratory, 09 lab tests were done.

Health promotion for all our patients.

### Photo Gallery

The Con Corazon staff checking on the medicines available and expiration date. The medicines that are close to expire are place in front of the rest of medicines on the shelf.

Johni and her husband Dino and their baby have started the day at 04:00 am. They receive all the patients who come from different towns. Sometimes they have to turn away some patients because there are too many.

The greenhouse is getting ready. It took a long way to come to this point. Next time the roof and vegetables.
