

Con Corazón Outreach Report

24th July 2023 – Marampaqui

On this occasion we had a visit from the press. A local television channel called [Inpecable](#) came to cover a report about the projects and activities that we have been carrying out in Marampaqui. Three people came, a television host, a journalist and a cameraman. They interviewed the patients and some residents of the area. They also had the opportunity to see the Con Corazón team in action inside our medical center.

We are very happy with the dissemination of our humanitarian work in the rural populations of Cusco. We firmly believe that this opportunity will allow us to convene more people who can help us achieve a better impact.

They also invited us to an interview next weekend on the set of the television channel, where we will present and answer many questions regarding our efforts to achieve a better quality of life for the inhabitants of the high Andean areas of Cusco.

Activities

Medicine, we have seen 25 patients.

Dentist, 12 patients

Laboratory, 12 lab tests were done.

Health promotion for all our patients.

Photo Gallery

Mushrooms in the drying process for consumption and/or commercialization. These grow under the pine trees that Con Corazón has planted.
