

Con Corazon Outreach Report

9th August 2023 – Marampaqui

On this occasion, as soon as we arrived in Marampaqui, we were surprised to find a small building 30 meters from our greenhouse. Another greenhouse is being built! How nice it is to see that the neighbors are interested in improving their nutritional conditions and consequently their health. This is a small sample of the impact our activities have achieved so far. We know there is much more to do.

When we witness these things, our hearts light up and encourage us to continue our work to reach those who need it the most. Because of this, we decided to support the owner of the small construction with a plastic roof and vegetables, so that the neighbors feel that we are interested in their sustainable community development.

Activities

Medicine, we have seen 25 patients.

Dentist, 13 patients

Laboratory, 10 lab tests were done.

Health promotion for all our patients.

Photo Gallery

Monitoring our Ivoclar project in a school in Ocongate. Oral health for all the students!

Stablishing new relationship with the brand-new community leaders, this time the president of Pacchanta. The gathering was in a school facility.
