

Con Corazon Outreach Report

25th August 2023 – Marampaqui

Plants and vegetables are already growing in our greenhouse. In addition, another greenhouse has just been born next to ours. This belongs to one of our neighbors from the Marampaqui community who considered that the idea of increasing vegetables in the diet of Porfirio and his family is a good initiative.

A few months before, due to bad weather and strong wind, we lost the roof of the greenhouse. People had no vegetables for quite some time and had to buy them at the market. They told us that after the health and nutrition promotion talks that we regularly give them, they took seriously the real importance of having more nutrients in their bodies.

Lately the price of vegetables and fruits has increased considerably in the local market, which makes access to these products even more difficult. We are also enthusiastic about the idea of having more greenhouses at the initiative of the local population. We are always here to support good ideas that contribute to and strengthen the well-being of the people who directly benefit from these great initiatives. We will continue to encourage more people to follow the same path.

Activities

Medicine, we have seen 25 patients.

Dentist, 12 patients

Laboratory, 10 lab tests were done.

Health promotion for all our patients.
