

Con Corazón Outreach Report

13th March 2024 – Marampaqui

Due to the demand for dental treatments, on this occasion we have had two more dentists. Dr. Janine Vega and Dr. Carlos Rios, who are currently dentists of the Ivoclar project within Con Corazón, accompanied us this time to Marampaqui to support our dental department. It was the first time for them and they were both very happy with the experience gained.

There were more dental treatments, dental extractions and more dental hygiene. We use two environments, the pediatrics and the laboratory, without this interrupting the regular activities of our biologist Wendy.

After this magnificent experience, they were encouraged themselves to come a second time for the next outreach at the end of March.

Activities

Medicine, we have seen 25 patients.

Dentist, 32 patients

Laboratory, 8 lab tests were done.

Health promotion for all our patients.
