

## Con Corazón Outreach Report

24<sup>th</sup> January 2025 – Marampaqui

Our institution, Con Corazón, aims to teach children the importance of regular handwashing. This habit is essential for maintaining good hygiene, preventing illness, and promoting a healthy quality of life. Proper handwashing is one of the most effective measures to prevent the spread of viruses and bacteria that can cause illness, especially among children.

However, unfortunately, this is a habit that is not always taught at home. Often, due to lack of time or knowledge, parents do not teach their children the importance of this simple, yet vital, act of hygiene. At our institution, we seek to fill this gap and teach children not only the correct handwashing technique, but also why it is so important to do so.

Through educational and repetitive activities, children learn to do it independently and become agents of change, teaching their families what they have learned. By instilling this habit in our institution, we ensure that children have the tools to take care of their health and promote a healthier life for themselves and their surroundings.

### Activities

Medicine, we have seen 25 patients.

Dentist, 13 patients

Laboratory, 13 lab tests were done.

Health promotion for all our patients.
