

Con Corazón Outreach Report

15th July 2025 – Marampaqui

Health promotion continues to be one of the most important aspects of our work in the village of Marampaqui. Beyond treating illnesses, our mission is to equip the community with the knowledge and tools they need to stay healthy. This recent visit brought to light a growing concern: several individuals were identified with sexually transmitted diseases (STDs).

This finding reinforces the importance of preventive measures. While treatment is essential, prevention remains the most effective and sustainable approach to addressing STDs. Through education, awareness campaigns, and open conversations, we can help break the cycle of infection and protect the community's overall well-being.

During our visit, we provided information on safe practices, the importance of regular medical check-ups, and how to recognize early symptoms. We emphasized that prevention not only safeguards one's health but also preserves the health of partners, families, and the entire community.

Yamilet is encouraging responsible behaviors and reducing stigma around discussing sexual health, we aim to empower the people of Marampaqui to make informed decisions. The success of this effort depends on ongoing collaboration, continued education, and consistent community engagement.

Activities

Medicine, we have seen 25 patients.

Dentist, 12 patients

Laboratory, 10 lab tests were done.

Health promotion for all our patients.
